The Battle Continues

There are new websites coming daily as people become more and more aware that there's something *different* about these towers being deployed everywhere. Of course, it's imperative that they not just notice but also take steps to challenge their presence and educate themselves about the dangers of 5G. Welcome to the fight.

We have packages containing all the documents you need!

Why reinvent the wheel when you discover a tower or antenna deployed near your school or home? We can help! Contact us for additional details at mandy@5gfree.org or admin@5gfree.org or call 877.223-1968 for additional details! We can save you both

Are Children Safe in the Schools We Are Paying For?

A revolution is happening in this country over the 'rollout' many reported of cells deployed in schools. Did it happen?

- Schools are getting money for rolling out 5G
- The tower companies know and must never be exempted from liability
- Studies clearly show radiation is a carcinogen

Allegations have been made that the COVID-19 happened with the 5G rollout almost simultaneously for a reason..

Critics contend that the towers have a fast and profound effect on children and even wi-fi is accumulating a higher level of parental complaints than ever before – largely because parents are becoming concerned for the health of their children.

If you have had a tower deployed on or near you, we can assist with determining how to address those responsible for any permissions given [often prematurely] and stop it in time.

time and money by challenging the presence of the towers in ways they cannot avoid. There is more than enough evidence to PROVE beyond a shadow of a doubt that the towers being deployed are dangerous to ALL living things: not just humans! They are, across the board, extremely damaging and will bring about deterioration and death. How quickly this happens will depend upon the settings utilized on the towers. You didn't expect them to maintain a static setting, did you? Of course not — because you immediately recognize the dangers posed by the presence of those towers and began looking into this matter. That's why you found us — and that's why you're here.

Unfortunately, too many people trust that the government would never allow anything 'dangerous' to be widely utilized against American citizens. They trust that anything the government does is for their good and intended to keep them healthy as well as informed.

Thus, there need to be sites that show people the news they're not allowed to see — to hear the interviews they're not supposed to hear — before they're removed from the Internet.
